## SUMMARY

Motivated Computer Science student with strong foundations in programming, data structures, and cloud technologies. Proficient in Java, Python, and SQL with hands-on experience in AWS services including EC2, S3, Lambda, and Rekognition. Developed real-time AI-based systems using OpenCV and YOLOv8. Seeking a Software Engineer or AWS/DevOps Trainee role to apply technical skills and contribute to scalable applications.

## PROJECTS

### ICU Face Recognition Access System

[GitHub](#)

- Developed a real-time ICU security system to control visitor access in a scalable cloud-based environment.
- Captured and processed visitor images using webcam for authentication.
- Integrated AWS S3 and Rekognition for secure image storage and face matching.
- Designed backend logic for validation and access decision-making.
- Generated alerts using AWS SNS for unauthorized access detection.

### AI-Based Helmet Detection System

[GitHub](#)

- Developed a real-time AI-powered helmet detection system using YOLOv8 and OpenCV.
- Implemented voice alerts using pyttsx3 Text-to-Speech technology for helmet violations.
- Integrated AWS S3 using boto3 for automatic cloud storage of captured violation images.
- SMTP-based email notifications to send AWS S3 image URLs to admin.
- Built a Streamlit dashboard to display system status, timestamps, and captured image records.

## EXPERIENCE

### AWS & DevOps Intern, Technical Hub Pvt. Ltd.

May 2025 - Jun 2025

- Worked with AWS services including EC2, S3, and IAM for application deployment.
- Assisted in implementing DevOps practices using Git and CI/CD concepts.
- Gained hands-on experience in cloud deployment and monitoring.
- Collaborated on automation tasks to improve development and deployment workflows.
- Worked in a collaborative environment following basic SDLC and CI/CD practices

## TECHNICAL SKILLS

|                                  |                                                                                                                             |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages:</b>    | C, Java, Python                                                                                                             |
| <b>Database:</b>                 | SQL, MySQL                                                                                                                  |
| <b>Core Subjects:</b>            | Data Structures and Algorithms, Operating Systems, Computer Networks                                                        |
| <b>Operating System:</b>         | Linux, Windows                                                                                                              |
| <b>Cloud &amp; AWS Services:</b> | EC2, S3, IAM, VPC, EBS, Auto Scaling, Load Balancer, Elastic Beanstalk, ECS, Lambda, RDS, API Gateway, SNS, SES, CloudWatch |
| <b>DevOps:</b>                   | Docker, Kubernetes (Basics), Git, GitHub (Version Control), CI/CD (Basics), Terraform (Basics), Jenkins                     |
| <b>AI Tools:</b>                 | ChatGPT, GitHub Copilot, Gemini, AWS Rekognition, AWS Comprehend, AWS Textract                                              |

## CERTIFICATIONS

- **IT Specialist – HTML & CSS** (Certiport, Pearson, CertNexus)
- **Oracle Certified Foundations Associate** – Java Certified Foundations Associate
- **Oracle Certified Foundations Associate** – Database
- **Red Hat Certified System Administrator (RHCSA)**
- **AWS Certified Developer - Associate**

## ACHIEVEMENTS

- Achieved **5-star golden badge** in SQL, **3-star silver badges** in C, Java, Python on [HackerRank](#).
- Solved **200+ problems** on [LeetCode](#) and **500+ problems** on [CodeChef](#).
